Aluminium Composite Panel

Aluminum composite panel or aluminum-plastic plate, refers to the kind of panels that use plastic as the core layer, aluminum as two sides, that is three layer composite panel, and the product surface is covered by decorative coating as decorative surface of products, with the plastic film to protect it. Aluminum composite panels, as a new kind of decoration material, since the late eighties and early nineties are imported from South Korea and Taiwan to China, with its economy, optional color diversity, convenient construction method, excellent processing performance, excellent fire resistance and noble quality, they are quickly popular among people.

Range of applications:

1. Building exterior wall, curtain wall
2. The old building external walls modification and refurbishment
3. The balcony, equipment unit, interior compartments
4. Panel, sign board, display racks
5. Interior decorative panels, ceilings, advertising signs
6. Industrial materials, cold car body
